

Are Vaccines Safe? Did they save the world? The history of vaccines.

WARNING: Everything you believe about vaccines may be changed by this info.

Definitions:	<p>Immunization</p> <p>A procedure for creating resistance to a pathogen. Such procedures include vaccination and treatment with antibodies.</p> <p>Vaccination</p> <p>Introduction into an organism of a material designed to provoke an immune response that will provide protection from a related disease agent.</p> <p>Inoculation</p> <p>The introduction of material into a person to provoke immunity to a disease. “Inoculate” is often used to refer to the historical practice of variolation.</p> <p>Variolation</p> <p>A smallpox immunization technique once practiced in many locations worldwide. Variolation involved the transfer of matter from a smallpox sore into a cut in the skin of an uninfected person. The variolated person would generally experience a local reaction or mild form of the disease, and thereafter be immune to smallpox. Variolation, however, carried the risk of severe infection and death. Variolation was replaced with smallpox vaccination after Edward Jenner published his findings on the use of cowpox material to induce immunity to smallpox in 1798.</p> <p>Adjuvant</p> <p>An agent added to some vaccines that enhances the immune system’s response to vaccine antigens. Adjuvants used in vaccines include aluminum salts and, in Canada and the European Union, squalene, which is a fish-oil derived material.</p> <p>Herd Immunity</p> <p>Indirect protection against disease that results from a sufficient number of individuals in a community having immunity to that disease. With enough immune individuals, the transmission of a disease can be reduced, limiting the potential for one individual to be exposed to it. Herd immunity does not apply to diseases, such as tetanus, that are not spread via person-to-person contact.</p> <p>Thimerosal</p> <p>An ethylmercury compound used as a preservative. Thimerosal was used in many killed-virus vaccines until it was recommended to be removed from most childhood vaccines in 1999. It is still used in multi-dose influenza vaccines, and can be trace amounts (a relic of the manufacturing process) in other vaccines.</p>
How was our current medical system shaped? (taken over)	<p>Rockefeller Medicine (video)</p> <p>Corbett • 11/04/2013</p> <p>In order to promote a profitable system that he could benefit from, he crushed every other form of medicine and funded drugs and surgery. He took control of medical education and ensured that no other forms of medicine were taught while discrediting and attempting to eliminate homeopathy, herbalism, traditional Chinese medicine, naturopathy, chiropractic, etc.</p> <p>What we call Alternative medicine today is really traditional medicine and what we call traditional medicine is only around 100 years old.</p>

How John D Rockefeller Medicine killed Natural Cures and Alternative Medicine / Herbal Medicines

How Rockefeller Founded Big Pharma And Waged War On Natural Cures

<https://dta0yqvfnusiq.cloudfront.net/allnaturalhealingsrq/2019/04/How-Rockefeller-Founded-Big-Pharma-and-Waged-War-on-Natural-Cures-5cb3d7374f337.pdf>

How Rockefeller Created the Business of Western Medicine

But there was a big problem with Rockefeller's plan. Natural and herbal medicines were very popular in America during the early 1900s. Almost one half the medical colleges and doctors in America were practicing holistic medicine, using extensive knowledge from Europe and Native American traditions. Rockefeller knew that to get total control of the medical industry he would have to expunge the competition. Rockefeller's first move was to use his vast wealth (from oil) to purchase part of the German pharmaceutical company I.G. Farben. (look up Farben's involvement in WWII). Now that he controlled a drug manufacturing company he could move forward with his plan to eliminate the competition.

The Flexner Report of 1910 and Its Impact on Complementary and Alternative Medicine and Psychiatry in North America in the 20th Century

This development was largely based on the restructuring of research universities in both of the USA and Canada following the influential report of Johns Hopkins-trained science administrator and politician Abraham Flexner (1866–1959). Flexner's report written in commission for the Carnegie Foundation for the Advancement of Teaching in Washington, DC, also had a major influence on complementary and alternative medicine (CAM) in psychiatry throughout the 20th century.

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC3543812/>

Flexner Report ... Birth Of Medical Education

The Flexner Report is the most important event in the history of American and Canadian medical education. It was a commentary on the condition of medical education in the early 1900s and gave rise to modern medical education. The report is named for Abraham Flexner (1866-1959) who prepared it.

Abraham Flexner was not a doctor but was a secondary school teacher and principal for 19 years in Louisville, Kentucky (where this writer's uncle was one of his students). Flexner then took graduate work at Harvard and the University of Berlin and joined the research staff of the Carnegie Foundation for the Advancement of Teaching. For the Carnegie Foundation, Flexner researched, wrote and in 1910 published a report entitled "Medical Education in the United States and Canada." It is known today as the Flexner Report.

<p>Research Question: Did vaccines really cause diseases to decline?</p>	<p>Many modern health “authorities” credit vaccines for the decline in disease and assure us that vaccines are safe and effective. But is that true? https://thetruthaboutvaccines.com/the-truth-about-vaccinations/ https://thetruthaboutcancer.com/wp-content/uploads/2015/04/pic.png</p> <p>Notice that these diseases were virtually wiped out before the introduction of their respective vaccines! Rather the decrease in these childhood maladies weren’t due to vaccinations (as you may have been told) but were mainly the result of improved public health and hygiene (including sanitation and cleaner drinking water) during that time.</p> <p>Many people who have looked at this data had the sudden and uncomfortable realization that they have been lied to their entire lives. The medical profession is taking credit for making these</p>

	<p>diseases go away. They do not deserve the credit because vaccines did not make these diseases go away, better sanitation did.</p> <p>https://childrenshealthdefense.org/vaccine-secrets/video-chapters/vaccines-do-not-deserve-the-credit-for-reducing-contagious-diseases/</p> <p>Didn't Vaccines Wipe Out Diseases? The Untold Truth About Vaccines (video) Dr. Sheri Tenpenny (Vaccine Expert) September 24, 2015 https://thetruthaboutvaccines.com/untold-truth-about-vaccines/</p> <p>The Vaccine Safety Lesson Every Doctor Needs (video) By Dr. Sherri Tenpenny, D.O. October 1, 2015 https://thetruthaboutvaccines.com/vaccine-safety-lesson-doctors/</p>
<p>Research Question: What about Polio? Surely the vaccine wiped out polio, right?</p>	<p>Even Dr. Jonas Salk, the creator of the inactivated or “killed-virus vaccine” used in the 1950s, “testified that the live-virus vaccine (used almost exclusively in the U.S. from the early 1960s to 2000) was the ‘principal if not sole cause’ of all reported polio cases in the U.S. since 1961.” (<i>Washington Post</i>, September 24, 1976)</p> <p>In 1977, Salk testified before a Senate subcommittee that “all polio outbreaks since 1961 were caused by the oral polio vaccine.” In 1985, the CDC reported that 87% of the cases of polio in the USA between 1973 and 1983 were caused by the vaccine and most of the reported cases occurred in fully immunized individuals.</p> <p>The Polio Vaccine Cancer Cover-up By Ty & Charlene Bollinger March 4, 2022 https://thetruthaboutvaccines.com/polio-vaccine-cancer/</p> <p>SV40 CDC statement (Thanks to the Way Back Machine) http://www.cdc.gov/vaccinesafety/updates/archive/polio_and_cancer_factsheet.htm</p> <p>How a Cancer-Causing Monkey Virus Ended Up in Polio Vaccines https://childrenshealthdefense.org/defender/cancer-causing-simian-monkey-virus-polio-vaccines/</p> <p>More Polio Caused by Vaccine Than Wild Virus – WHO Confirms By Charlene Bollinger February 3, 2020 https://thetruthaboutvaccines.com/polio-vaccine-causes-polio/</p> <p>Vaccine-derived poliovirus type 2 Africa, the Philippines and others https://childrenshealthdefense.org/news/childrens-health/polio-vaccination-still-causing-polio-after-all-these-years/</p> <p>A Story About Polio, Pesticides and the Meaning of Science https://childrenshealthdefense.org/defender/polio-pesticides-ddt-science/ https://historyofvaccines.org/history/polio/timeline September 15, 2020</p> <p>The Polio and “Non-Polio” Shell Game in Africa and the U.S. — 2020 Update</p>

	<p>In addition to officially acknowledged vaccine-derived polio cases, which increased substantially from 2018 to 2019, the African region also annually reports <i>tens of thousands</i> of cases—over 31,500 from just 18 countries in 2017—of acute flaccid paralysis (AFP), a debilitating condition with a clinical picture virtually identical to polio. Many other countries—ranging from India to Italy—also record significant numbers of AFP cases.</p> <p>The CDC has assiduously avoided mentioning one iatrogenic (medically induced) cause that is staring the agency in the face: 70 years of published studies along with manufacturers’ package inserts documenting a trail of polio-like symptoms (ranging from myelitis, numbness, pain and limb paralysis) following vaccination</p> <p>https://childrenshealthdefense.org/news/the-polio-and-non-polio-shell-game-in-africa-and-the-u-s-2020-update/</p> <p>Bill Gates Visits New Delhi Clinic To Encourage Final Push To Eradicate Polio</p> <p>https://www.gatesfoundation.org/ideas/media-center/press-releases/2000/09/support-for-vaccinepreventable-diseases</p> <p>India's polio-free status a cruel joke</p> <p>https://www.downtoearth.org.in/blog/indias-poliofree-status-a-cruel-joke-43847</p>
<p>Research Question: The greatest lie ever told is that vaccines are safe and effective. -<i>Dr. Len Horowitz</i></p>	<p>But don’t take Dr. Horowitz’s word for it! Check out the statistics for yourself; from 1990 to 2008, the U.S. Government recorded 238,755 vaccine related injuries and deaths, according to the VAERS database. Since the FDA estimates that 90% of vaccine reactions go unrecorded, we can extrapolate that during the past 18 years, there have actually been almost 2.4 million vaccine related injuries and deaths!” – Vaxxed: From Cover-Up to Catastrophe</p> <p>Vaccine Safety Has Not Been Established by Ted Kuntz</p> <p>A product can be <i>effective</i> and not <i>safe</i>. Our history is replete with examples of this:</p> <ul style="list-style-type: none"> • DDT was effective and not safe • Thalidomide was effective and not safe • Asbestos was effective and not safe • Glyphosate was effective and not safe • OxyContin was effective and not safe • Vioxx was effective and not safe <p>https://vaccinechoicecanada.com/in-the-news/vaccine-safety-has-not-been-established/</p> <p>“We and our children have been and are the victims of a carefully orchestrated, programmed propaganda campaign in which maximum publicity is repeatedly given to rare complications from one of the childhood diseases while actively suppressing the cases of morbidity and death caused by vaccines.”</p> <p>~ Dr. Thomas Stone, MD</p>
<p>Research Question: Do vaccines cause autism?</p>	<p>The scientist, Dr. William Thompson, confessed that the CDC had omitted crucial data in their final report that revealed a causal relationship between the MMR vaccine and autism. Over several months, Dr. Hooker records the phone calls made to him by Dr. Thompson who provides the confidential data destroyed by his colleagues at the CDC.</p> <p>https://vaxxedthemovie.com/about/</p> <p>In the 1970s, only 1 child in 10,000 had autism. In the 1990s, there was a “stepped-up vaccine schedule” where the amount of thimerosal was drastically increased in most childhood vaccines, including the MMR and DPT. Now, in the year 2009, autism affects 1 in 67 children! It is a well-</p>

	<p>established fact that exposure to mercury can cause immune, sensory, neurological, motor, and behavioral dysfunctions – all similar to traits defining, or associated with, autism.</p> <p>Interestingly, in March of 2008, the U.S. government conceded that childhood vaccines were responsible for the autism in 9-year-old Hannah Poling. This unprecedented concession was in response to one of three test cases that allege thimerosal caused autism in children.</p> <p>I am no longer “trying to dig up evidence to prove” vaccines cause autism. There is already abundant evidence.... This debate is not scientific but political. —Dr. David Ayoub, M.D</p> <p>According to Dr. James R. Shannon, former director of the National Institute of Health reported in December 2003 that “the only safe vaccine is one that is never used.”</p> <p>https://thetruthaboutvaccines.com/the-truth-about-vaccinations/</p> <p>Vaccines and Autism: Expert Exposes DOJ Vaccine Fraud By Ty Bollinger January 8, 2019</p> <p>https://thetruthaboutvaccines.com/vaccines-and-autism/</p> <p>In February 2017, Children’s Health Defense collected 89 peer-reviewed published articles linking autism, mercury and thimerosal. Each of these article abstracts are presented here along with a short annotation in layman terms about what the researchers found and how the findings are linked to autism. The science continues to accumulate that mercury and thimerosal are potent drivers of the autism epidemic. Download PDF (36.4MB)</p> <p>https://childrenshealthdefense.org/known-culprits/mercury/thimerosal-history/research-critiques/</p> <p>August 11, 2020</p> <p>Vaccines and Autism—Is the Science Really Settled?</p> <p>https://childrenshealthdefense.org/news/vaccines-and-autism-is-the-science-really-settled/</p> <p>CDC has destroyed evidence that black boys are 3.36 times more likely to develop autism if they receive the MMR vaccine before age 3</p> <p>https://childrenshealthdefense.org/wp-content/uploads/Mandates-African-American-Facts.pdf</p>
<p>Research Question: How about Tetanus.</p>	<p>Infertility: A Diabolical Agenda</p> <p>“When they’re through with Africa, they’re coming for you.”</p> <p><i>Dr. Stephen Karanja</i></p> <p>https://infertilitymovie.org/</p> <p>Tetanus vaccine may be laced with anti-fertility drug. International / developing countries</p> <p>Vaccine Wkly . 1995 May 29 - Jun 5;9-10.</p> <p>https://pubmed.ncbi.nlm.nih.gov/12346214/</p>
<p>Research Question: What are the ingredients in childhood vaccines?</p>	<p>Types of Vaccine Ingredients</p> <p>https://childrenshealthdefense.org/vaccine-secrets/video-chapters/vaccines-contain-dangerous-ingredients-small-doses-can-be-unhealthy-disease-is-a-product-of-genetics-and-environment/</p> <p>Due to the fact that <i>E. coli</i> can cause serious illness and the fact that many of the illnesses listed by the CDC can, in fact, be found listed as side effects, I decided to investigate exactly which ingredients are being added to our vaccinations and why.</p>

	<p>https://thetruthaboutcancer.com/wp-content/uploads/E.-Coli-789x1024.png</p> <p>It is worth noting that, while the CDC has listed <i>E. coli</i> as an ingredient of the vaccine, Bexsero, in their literature on vaccine ingredients, the manufacturer, GSK, failed to include it as an ingredient in their information leaflet.³</p> <p>The reason why GSK decided to leave this particular ingredient out of their information leaflet remains a mystery.</p> <p>https://thetruthaboutvaccines.com/e-coli-vaccine-ingredient-list/</p> <p>Vaccine Dangers: Is the Aluminum in Vaccines Worth the Risk? By Dr. David Jockers DC, MS, CSCS February 14, 2019</p> <p>The maximum concentration of aluminum allowed in a vaccine today is 0.85 mg and was established by the FDA to limit exposure risks. However, as a result of normal vaccination procedures, babies receive up to 4 mg of aluminum before they reach six months of age.</p> <p>https://thetruthaboutvaccines.com/vaccine-dangers-aluminum/</p> <p>At a conference held by the National Vaccine Information Center in 1987, world renowned immunologist Dr. High Fudenberg presented his research. He shared that receiving the flu vaccine 5 years in a row would increase one's risk of developing Alzheimer's disease by tenfold compared to having less than 2 shots. His statement was founded from his research that showed that the mercury and aluminum found in the flu shot accumulates in the brain leading to cognitive impairment.</p> <p>Vaccine Package Inserts are hard to find: Sorry... page not found...</p> <p>https://www.vaccinesafety.edu/ef435982-d1ff-431d-9c96-30ecdf7ce44f/package_inserts.htm/</p> <p>But here's some that you are allowed to see:</p> <p>https://www.vaccinesafety.edu/package-inserts-and-manufacturers-for-some-us-licensed-vaccines-and-immunoglobulins/</p> <p>https://vaccinechoicecanada.com/about-vaccines/vaccine-ingredients/</p> <p>https://vaccines411.ca/en/healthcare-professionals/product-monograph</p>
<p>Research Question:</p> <p>Harold Buttram, MD, FAACP</p> <p>Back when doctors could express contrary opinions and have articles published that disagreed with "safe and effective</p>	<p>It's estimated that half of infant deaths is attributed to child abuse classified as Shaken Baby Syndrome/Non-Accidental Trauma, for which parents are legally prosecuted.....subdural hemorrhages can result from brain inflammation due to vaccine adverse events along with other diseases connected with vaccinations.....Gardner noted that there was a distinct age difference between nontraumatic brain hemorrhages in Japan and in America, where most nontraumatic brain hemorrhages tend to occur during the first six months of life. The clear explanation, according to Dr. Gardner, [29] was that Japanese do not begin their vaccines until seven months, whereas in the United States they are administered during the first six months, starting within 24 hours of birth with the Hepatitis B vaccine..... vaccines can and do cause a significant percentage of subdural brain hemorrhages which, tragically, are being falsely and unjustly misdiagnosed as inflicted abuse by parent or caretaker.</p> <p>Dr. Buttram has written extensively on the harms. You will find a list of articles here: http://www.whale.to/vaccines/buttram.htm</p>

<p>Research Question: Do Vaccines cause Cancer?</p>	<p>Can Vaccine Ingredients Cause Cancer? <p>Research Question: Have people been experimented on?</p>	<p>For nearly as long as modern medicine has existed, so have egregious ethical violations. When hear the term “medical experimentation,” your mind may recall the horrendous experiments conducted in Nazi Germany on Jews, communists, homosexuals, and an assortment of other “undesirables” under the Third Reich. While these experiments were undoubtedly appalling, they were neither the first nor the last of their kind.</p> <p>In fact, the history of unethical experiments in the United States is long and harrowing. Children, soldiers, minorities, prisoners, and even entire cities have been forcibly or unknowingly subjected to dangerous, cruel, and often lethal experiments... all in the name of science.</p> <p>While the instance of illegal and unethical medical experimentation dates back before the founding of our nation, we’re going to start 177 years ago, in 1845. The following is a brief history of just some of the horrendous, inhumane experiments conducted by the medical and scientific communities (often in partnership with the U.S. Government).</p> <p>In the words of Edmund Burke: “Those who don’t know history are doomed to repeat it.” Here are just a few examples of the Medical Industrial Complex experimenting with dangerous drugs on unwilling victims.</p> <p>https://thetruthaboutvaccines.com/unethical-experiments-defined-modern-medicine/</p> <p>The Tuskegee Experiment is not about vaccines but does contain important history that needs to be included.</p> <p>https://www.mcgill.ca/oss/article/history/40-years-human-experimentation-america-tuskegee-study</p> <p>“Medical Racism: The New Apartheid,” CHD Films (2021, 41:52) promoting Medical Racism: The New Apartheid documentary film and protect the health of children. The remedies are all natural, rarely have side effects and are not addictive. They are safe for adults, the elderly as well as for infants and children.^[54] They are also very economical, in fact, far less expensive than vaccination.</p> <p>https://www.ijrh.org/article.asp?issn=0974-7168;year=2020;volume=14;issue=2;spage=129;epage=135;aulast=Nayak</p> <p>About Homeopathic Nosodes</p> <p>Influenzinum (Influ.): Influenza. (flu).</p> <p>This nosode is used for immune boosting for influenza (flu.)</p> <p>Influenzinum is made each year from the same influenza strain that is used in the flu vaccine for the year. It is used to treat flu symptoms and possibly prevent flu. Influenzinum is the only homeopathic flu product that is updated each year based on the flu strains predicted by the World Health Organization (WHO). It is specially formulated to stimulate the body's own defense system to resist the onset of the season's flu strains. It is shown year after year to be highly effective to prevent the flu. It is safe and natural, this helps your immune system, not depress it as other methods to prevent the flu.</p> <p>https://www.homeopathyforwomen.org/nosodes.htm</p> <p>Nosodes.</p> <p>By Guy Beckley Stearns, M. D. Presented by Sylvain Cazalet</p> <p>(Read before I. H. A., Bureau of Materia Medica, June 25, 1936.)</p> <p>"A nosode is an isopathic remedy consisting of the product of some specific disease administered in minute doses for the cure of the same disease". (<i>Century Dictionary.</i>)</p>

nfluenzin is the most important of all the nosodes.

<http://www.homeoint.org/cazalet/stearns/nosodes.htm>

Influenzinum - A Non-Toxic Alternative to the Flu Shot

So what do I do to keep families healthy without the shot? **Homeoprophylaxis** - which can be used for almost all infectious diseases. I found this protocol after my daughter had a bad reaction to one of the standard vaccines, and it was out of FEAR of the infectious disease that I found the gem in my own therapy.

What is Homeoprophylaxis?

Homeoprophylaxis has been used in underdeveloped countries with full success. Without going in the exact statistics, I'd like to mention that the goal of HP is to give the developing immune system a mild immunological stimulation towards a variety of infectious disease processes using homeopathic nosodes. A nosode is a homeopathically attenuated, ultra-diluted preparation of a pure disease agent. Each child responds to this stimulation in her/his own way, based on their unique susceptibility. A normal immune response can include fever, fussiness, and discharge based on the symptom characteristics of the nosode given. As there is no actual disease agent in the nosode, it is normal for this mini-immunological expression of the general, innate immune system to pass on its own within 12-24 hours of taking the remedy. This immunological rehearsal, or education process, is what builds immunity.

World Homeopathy Day: Homeopathy can manage modern infectious diseases, shares a homeopath

Homeopathy has a long history of prophylaxis against epidemics.

Historically, homeopathy was used to treat and protect against scarlet fever by its founder, Dr. Samuel Hahnemann. Homeopathy was also famously used during the Spanish flu epidemic after World War 1. Dr. Marino has published peer reviewed research about homeopathic prophylaxis against swine flu and dengue in 2008 and 2009.

One of the most important pieces of research on prophylaxis with homeopathy in recent memory is the prophylactic effect of homeopathic medicines prepared by dilutions of the causative organism of a disease called leptospirosis in Cuba. This was published in 2010. 2.3 million Cubans were provided homeopathic prophylaxis and a much lower than expected incidence of the infection occurred that year. What is most relevant about this is that leptospirosis is a bacterial infection that humans contract from animals!

India has seen epidemic conditions of viral infections like dengue, chikunguniya and swine flu. Hundreds of thousands of homeopathic prescriptions for the treatment and prevention of these diseases are prescribed each year.

Homeopathy is used in intensive care units of hospitals when there is acute respiratory distress or multiple organ dysfunction and often when there is no hope of improvement left. Similar positive effects of homeopathic treatment have been seen in severe acute respiratory syndrome (S.A.R.S.) cases.

Communicating effectively about immunization: Canadian Immunization Guide

For health professionals

*****Read this whole page if you can stand the propaganda and really pay attention to language*****

<https://www.canada.ca/en/public-health/services/publications/healthy-living/canadian-immunization-guide-part-1-key-immunization-information/page-5-communicating-effectively-immunization.html>

Vaccine hesitancy

Vaccine hesitancy is a term used to describe a refusal of vaccination or a delay in an immunization schedule due to concerns about immunization. Vaccines evoke concerns different from other health interventions because vaccines are generally offered to individuals who are healthy, as opposed to other health interventions that are predominantly intended for individuals with a disease. Vaccine hesitancy is a complex issue with multiple determinants, the most important being:

- lack of understanding about the vaccine being given and about immunizations in general;
- conflicting information from a variety of sources (for example, alternative medicine practitioners, anti-vaccination websites);
- mistrust of the source of information (for example, perceptions of business and financial motives of the vaccine industry);
- perceived risk of serious adverse events and concerns regarding injections (for example, pain and anxiety associated with immunization; coincidental rather than causal adverse events that are perceived as vaccine-related);
- lack of appreciation of the severity and incidence of vaccine preventable diseases;
- sociocultural beliefs (for example, religious beliefs).

Loss of public confidence in immunization can reduce the number of people who are immunized and result in resurgence of vaccine preventable diseases and associated complications. Evidence about the effects of misinformation, rumours, and anti-vaccine groups on vaccine coverage and consequent disease outbreaks in many countries is well documented.

The decision to immunize is a result of personal perceptions of complex vaccine and disease related information and the trust in individuals and institutions that produce, legislate, and deliver vaccines. Research has identified a number of factors that affect the extent to which an individual is trusted: perceptions of knowledge and expertise, openness and honesty, and concern and caring. Regular health care providers, such as vaccine providers, are perceived as trusted individuals and have a vital role in ensuring continued success of immunization programs and in maintaining confidence in the effectiveness and safety of vaccines. Besides demonstrating skills and expertise in the principles and practices of immunization, vaccine providers need to know how to counsel effectively and how to help vaccine recipients or parents knowledgeably to assess the benefits and risks of immunization, as well as the risks associated with being unvaccinated.

More in-depth info from Jonathan Otto. He raises a ton of money for the health of people in Africa and is also a film maker. He gives links to some great info in the email below.

Did you know that the World Health Organization (WHO) has been carrying out its population control agenda for 50 years...On potentially billions of poor, vulnerable (and unsuspecting) women in developing countries... Using coerced “vaccine” campaigns? The COVID jab is only the latest example of how the globalists are exploiting forced vaccinations to achieve their own nefarious goals...The tetanus vaccine campaign in Kenya is a well-documented, human rights violation where they were caught redhanded... In 1993, the WHO announced a “birth-control vaccine” for “family planning” targeted at young girls in Kenya.

According to research...

By 1976, WHO researchers had conjugated tetanus toxoid (TT) with human chorionic gonadotropin (hCG) producing a “birth-control” vaccine.

When obstetrician/gynaecologist, Dr. Stephen K. Karanja, who was also the former chairman of the Kenya Catholic Doctors Association noticed something was wrong with these vaccines, he urged for testing to be carried out on various batches...

What they found was shocking... [READ ABOUT IT HERE](#)

And, without any explanation, WHO halted its campaign in 1995. However, in 2014 they were at it again with a “neonatal tetanus” vaccine program...

This time, their schedule perfectly matched an anti-fertility schedule as women aged 15 - 45 were told to get 5 vaccines, six months apart – whereas regular tetanus prevention requires only one injection every five to 10 years...

This campaign has left many young women infertile and caused multiple miscarriages.

Dr. Stephen K. Karanja stopped at no cost to continue fighting against these deadly vaccines AND expose the secrets behind the WHO’s hidden agenda.

When the COVID jab was launched... He firmly advocated against it.

In 2021, Dr. Karanja supposedly died of COVID-19, and what he said before he passed was chilling.

Watch the documentary, ***Infertility: A Diabolical Agenda***, directed by Dr. Andrew Wakefield... And find out EXACTLY what his last words were...

And how the WHO clearly continues to falsely implement “vaccine” schedules with hidden agendas.

[WATCH IT HERE](#)

BUT... The population control agenda using vaccines did not stop there...

Other developing countries also found sterilization agents in their vaccines...

In March 2004, Dr. Haruna Kaita, a pharmaceutical scientist and Dean of the Faculty of Pharmaceutical Sciences of Ahmadu Bello University in Zaria, Nigeria took samples of the polio vaccine being administered in Nigeria to labs in India for analysis...

AGAIN... toxic sterilizing agents were detected.

Dr. Kaita reported that *“Some of the things we discovered in the vaccines are harmful, toxic; some have direct effects on the human reproductive system...”*

And just as Dr. Stephen K. Karanja was opposed by the government... Insisting on covering up their diabolical agenda, Dr. Kaita said that a Nigerian government doctor also tried to very persistently persuade him that these contaminants would not affect fertility.

[READ MORE HERE](#)

Fast forward to 2022... We’re seeing the BIGGEST population control agenda being carried out yet... The COVID jab!

And this time... The WHO has targeted the entire human population.

There’s no hiding how disastrous the effects of this deadly jab have been on people who have received it.

During a Q&A session with Dr. Andrew Wakefield, Dr. Christiane Northrup, Children’s Health Defence president and attorney, Mary Holland, Dr. Brian Hooker, and Dr. Liz Mumper...

The true secrets of infertility issues being caused by the jab were revealed.

Dr. Christiane Northrup who is a board-certified OB/GYN revealed some chilling facts about what she’s seeing post-vax... She reported that...

The sperm of inoculated men do not swim and eggs in inoculated women do not grow into embryos...

There’s been a 79% increase in fetal malformations...

Research has shown an 80% miscarriage rate for women who get the shot in the first and second trimesters...

Additionally... Dr. Northrup launched **MyCycleStory.com** along with Dr. Hooker and other scientists where women can report their symptoms post-jab.

Dr. Northrup reveals some of the most shocking effects that women have reported...

90-year-olds that started bleeding again and passing clots for weeks on end...

TWO tragic VAERS cases of 18-month girls who hemorrhaged and died after being exposed to spike protein shedding from their recently inoculated grandparents...

A shocking increase in decidual cast shedding – where the entire lining of the uterus sheds in the exact shape of the uterine cavity...

And that’s just some of the horrific effects of the jab. There’s still no way to tell what the long-term effects on fertility and many other areas may be.

[WATCH THE Q&A SESSION HERE](#)

At this point... There’s NO denying that the WHO is willing to go to extreme lengths to carry out their forced population control agenda.

If we’ve learned anything, it’s that they’ll continue to use so-called “vaccines” to harm the population, without them even knowing it.

We must continue to fight against their evil agendas... And ALL future vaccines that they try to push on us.

To Your Health, Jonathan Otto
