

## Public Health Officers Getting Paid Lots of Money to be Parrots – And Worse....Fear Mongers for Hire

Health officer Deena Hinshaw – starting as early as March 2020 – uses term frequently in her almost daily public press conferences “new normal”, she is not unique in using this term. This term became hated and may have possibly gone out of favor except perhaps with millennials who love everything with New in front of it.

### Where does Deena Hinshaw get this term?

March 2020: <https://www.who.int/docs/default-source/coronaviruse/key-messages-and-actions-for-covid-19-prevention-and-control-in-schools-march-2020.pdf>

#### Help children cope with the stress

For example, if your child is feeling sick and staying at home or the hospital, you could say, “You have to stay at home/at the hospital because it is safer for you and your friends. I know it is hard (maybe scary or even boring) at times, but we need to follow the rules to keep ourselves and others safe.

Things will go back to normal soon.”

March 11, 2020: <https://www.who.int/director-general/speeches/detail/who-director-general-s-opening-remarks-at-the-media-briefing-on-covid-19---11-march-2020>

WHO has been assessing this outbreak around the clock and we are deeply concerned both by the alarming levels of spread and severity, and by the alarming levels of inaction. We have therefore made the assessment that COVID-19 can be characterized as a pandemic. Pandemic is not a word to use lightly or carelessly. It is a word that, if misused, can cause unreasonable fear, or unjustified acceptance that the fight is over, leading to unnecessary suffering and death. WHO’s mandate is public health. But we’re working with many partners across all sectors to mitigate the social and economic consequences of this pandemic. This is not just a public health crisis, it is a crisis that will touch every sector – so every sector and every individual must be involved in the fight. Find, isolate, test and treat every case and trace every contact; Ready your hospitals; Protect and train your health workers. And let’s all look out for each other, because we need each other.

March 23, 2020: Beyond coronavirus: The path to the next normal

<https://www.mckinsey.com/industries/healthcare-systems-and-services/our-insights/beyond-coronavirus-the-path-to-the-next-normal>

These words were written 11 years ago, amid the last global financial crisis, by one of our former managing partners, Ian Davis. They ring true today but if anything, understate the reality the world is currently facing. It is increasingly clear our era will be defined by a fundamental schism: the period before COVID-19 and the new normal that will emerge in the post-viral era: the “next normal.” In this unprecedented new reality, we will witness a dramatic restructuring of the economic and social order in which business and society have traditionally operated. And in the near future, we will see the beginning of discussion and debate about what the next normal could entail and how sharply its contours will diverge from those that previously shaped our lives.

April 1, 2020 <https://iris.wpro.who.int/handle/10665.1/14500>

Regional and national leaders should strengthen their efforts in the "new normal" for older people by promoting self-care, use of IT, community-based care and age-friendly environment. These will create the foundation for "new future",

beyond the COVID-19 pandemic, where communities recognize people's health as an integral infrastructure, and are supporting older people to stay healthy, thrive, and age-in-place.

Apr 9, 2020: This is the new normal,' until COVID-19 vaccine developed: **Trudeau**

<https://www.youtube.com/watch?v=Qvb4WIC7Ccw>

WHO has a series of visuals that are produced very early on in the pandemic called **Covid-19: 'new Normal'**

# COVID-19: 'new normal'

**THE NEW NORMAL**

The fight against COVID-19 is far from over. The pandemic hasn't ended yet. Until there's an effective vaccine or treatment, everyone remains at risk of **#COVID19**.

**#StaySafe**

28 May 2020

**THE NEW NORMAL**

COVID-19 is merely biding its time, waiting for us to let our guard down.

So continue to practice protective measures like physical distancing, covering coughs and sneezes, and frequent handwashing

**#StaySafe**

28 May 2020

**THE NEW NORMAL**

We have all made sacrifices over the past few months to keep our families and communities safe. This collective effort has made a huge difference.

While restrictions are being lifted in some places, **#COVID19** isn't gone yet. We must continue to protect ourselves and each other.

28 May 2020

**THE NEW NORMAL**

**You still need to protect yourself against #COVID19, wherever you are:**

- Wash your hands frequently
- Cover coughs and sneezes
- Avoid touching your face
- Avoid crowded places and limit time in enclosed spaces
- Keep a distance of at least 1 metre from others
- Regularly disinfect frequently touched objects and surfaces
- Isolate yourself from others if feeling unwell and seek care, if needed

**#StaySafe**

28 June 2020

**PLUS 13 more...**

## Understanding our New Normal

In some places, where cases of COVID19 are going down, restrictions put in place to control the virus are being lifted.

Now more than ever, it's vital that we keep doing the right thing to keep infections down.

## Restrictions

Different parts of the same country may be affected by COVID-19 differently. Where there are higher case numbers, a higher level of restrictions may be put in place. Wherever you are, keep carrying out these key protective measures to keep case counts and restrictions down.

The language of a 'new normal' is being deployed almost as a way to quell any uncertainty ushered in by the coronavirus. With no cure in sight, everyone from politicians and the media to friends and family has perpetuated this rhetoric as they imagine settling into life under this 'new normal'.

Oct. 13, 2020: From the "new normal" to a "new future": A sustainable response to COVID-19

<https://www.who.int/westernpacific/news-room/commentaries/detail-hq/from-the-new-normal-to-a-new-future-a-sustainable-response-to-covid-19>

It can be safely said that Deena Hinshaw was repeating what she heard from public health, MSM and politicians like Trudeau, the PM of Canada (Who was also doing daily press conferences.) Almost word for word actually. We could have saved a lot of money by just showing the WHO video and we probably did not have to pay her at all.... What's her salary by the way?

Also: from Deena Hinsahw's Affidavit in recent court case:

8. I was appointed Alberta's Chief Medical Officer of Health by the Minister of Health pursuant to s. 13 of the Public Health Act, and I report directly to the Deputy Minister of Health.

9. While the Chief Medical Officer of Health plays a leadership role in Alberta's public health system within government and giving advice to AHS, the Chief Medical Officer of Health is not an independent officer of the Legislature like the Auditor General or the Child and Youth Advocate. Rather, as I serve at the pleasure of the Minister of Health, I can be removed from my position at any time. I am therefore subject to oversight within the democratic structure of the Government of Alberta.

10. I work alongside the Deputy Chief Medical Officer of Health (DCMOH) and the Deputy Medical Officer of Health (DMOH). The DCMOH role has been filled over this past year by Dr. Marcia Johnson and Dr. Andre Corriveau respectively, and the DMOH role is filled by Dr. Jing Hu. Alberta Health also employs numerous other experts in a variety of public health disciplines who provide me with information and advice to assist me in fulfilling my roles as the Chief Medical Officer of Health. Among these other experts that have been critical in supporting my office's work during the COVID-19 pandemic is Alberta's Emergency Operations Centre's Analytics team that provides modeling and surveillance support as detailed in the Affidavit of Dr. Kimberley Simmonds, and Alberta's Provincial Laboratory that provides PCR testing information as detailed in the Affidavit of Dr. Nathan Zelyas. I also work with various medical officers and other employees of AHS as detailed further in the next section of this Affidavit.

### The Rising Stars of Public Health Were Playing to a Captive Audience for A Long Time...

### *From Behind the Scenes to the Forefront: Canada's Public Health Officers*

Daily briefings by public health officers across the country have turned them into celebrities and prompted songs, T-shirts, street art and fan clubs.

Sep. 4, 2020: [https://www.huffpost.com/archive/ca/entry/bonnie-henry-deena-hinshaw-coronavirus\\_ca\\_5f528b0cc5b62b3add403b82](https://www.huffpost.com/archive/ca/entry/bonnie-henry-deena-hinshaw-coronavirus_ca_5f528b0cc5b62b3add403b82)

Dr. Deena Hinshaw and Dr. Bonnie Henry's celebrity is feeling the impact of tough decisions around schools. They've faced new scrutiny, with many Canadians on social media pivoting to calling them political pawns of their respective governments. "What they would like to do is correct this moment, so that we can go back to the way things were before where both of them were very impressive in how they were able to establish the public trust."

After months of praise, a sold-out periodic table dress like the one she wore on T.V. and calls to name an LRT station after her, Hinshaw has also faced recent criticism. In particular, she's been slammed for a last-minute change to the province's school reopening plan regarding distancing in classrooms, no longer mandating that a two-metre distance be kept.
